

Arte, Teorie e Tecniche del Software Libero

Confidential draft proposal: do not publish. Reply to <jaromil@dyne.org>

May 19, 2008

Docente: Jaromil

Questo modulo formativo introdurrà gli studenti alle sensibilità estetiche proprie dell'universo creativo del software libero, nonché agli strumenti adoperati ed in via di sviluppo. Verrà esplorato l'universo linguistico dei codici sorgenti, la possibilità di definire ed adoperare nuovi linguaggi per la generazione di materiali visivi e sonori, decostruendo le relazioni sintattiche e semantiche pre-stabilite dalle applicazioni sul mercato di consumo.

La pratica del seminario verterà sull'uso e la personalizzazione di software basati sul linguaggio per la creazione di audio video e testi, fra i quali: FreeJ¹ (Javascript), Fluxus² (Lisp/Scheme), Context Free Art³, Emacs⁴, Muse-el⁵, Latex⁶.
