Coltan is an abbreviation for **Columbite-Tantalite**. A mineral with the unique ability when refined to reduce corrosion and increase heat resistance.

Figure 1.1

The mineral is valuable for technology industries, its demand exploded in the past 10 years. It is used to produce **cell phones, dvd-players, laptop computers and games**<sup>1</sup> as well in **jet engines, ballistic missiles and nuclear reactors**.

**80% World's known reserves are in Congo (DRC)**, mostly in the Eastern provinces of **Kivus and Orientale**, extracted from the ore in a process similar to that of the Californian gold miners of the 1800s.

---

<sup>1</sup>the Play Station 2 production was halted in December 2000 because of coltan shortage

# The Blood

[Salaam/Shalom/Shan](#)

The war in Eastern Congo is mainly driven by economic factors: an outside consumer market hungry for **laptops and telephones** for which Congo delivers the raw materials.

Figure 2.1

The conflict has resulted in estimated **4 million deaths, 2 million displaced** and **340.000 refugees** in neighbouring countries.

**30% of East Congolese school children** are reported to be working in the coltan mines under inhuman conditions.

This crisis is the worst contemporary humanitarian crisis in the World provoked by Western post-colonialist economies.

# The Invasion

In 1998 leaders of Rwanda and Uganda, military trained and equipped by foreign countries, invaded the mineral-rich areas of Congo (DRC).

Figure 3.1

The invaders installed colonial-style governments supported in arms and training by Western allies, together with a \$5 million Citibank loan. Invasion of DRC allowed corporations as **American Mineral Fields** (AMF) to illegally mine. San Francisco based engineering firm **Bechtel Inc.** established ties, drawing up an inventory of mineral resources and providing the industry with refined supplies.<sup>2</sup>

## Salaam/Shalom/Shan

Payback to Congolese militias is mostly in arms, from dealers as **Simax**, **Lockheed Martin**, **Halliburton**, **Northrop Grumman**, **GE**, **Boeing** and **Raytheon**. Their action is covert under the face of “humanitarian” organizations as **CARE** (funded by Lockheed Martin) and **International Rescue Committee**.<sup>4</sup>

# Our Plan

Most international media still portrays the war in East Congo as an ethnic conflict, marginalizing efforts made by local communities to find a solution.

**Figure 5.1**

The indigenous Congolese organization **Yole!Africa** **calls everyone to stop using laptops, phones or I-pods on day July 2** to tell the World that many people, most unknowingly, are responsible for this ongoing catastrophe every time they buy a new laptop, phone or I-pod.

The hacker's network **dyne.org** **calls high-tech industries to free products from DRM, Trusted Computing and any other restriction** so that everyone in the World is able to appropriate the use of these technologies and build local businesses.

Yole!Afrika is co-producing a documentary about mobile phones and blood directed by Frank Polsen, out this year.
